

ON SITE VISIT

The On Site Visit is a this time when the faculty supervisor will go to the intern's home location and observe their teaching, review their files, and conduct a comprehensive case review of all the interns clients.

NATIONAL STANDARDIZED FINAL EXAM

When all the requirements are complete the Intern will be given approval to take a national standardized final exam. This exam is proctored in the student's home location and is offered four times a year.

APPLICANT ELIGIBILITY

Those eligible for the FertilityCare™ Practitioner Program are registered nurses with current licenses, allied health professionals with a degree in health, behavioral sciences, social sciences, or education. Other non- health fields are also individually recognized. Also eligible are person with associate degree/diploma such as: licensed practical nurse, human services practioner, or the equivalent of two years of university education. Further eligibility criteria requires that the applicant(s) practice(use) the CREIGHTON MODEL FertilityCare™ System or, if single and celibate, monitor their natural fertility and be a philosophical acceptor of the System.

COST AND FEES

The tuition and costs of books, educational materials and materials for 18 clients required for the entire program is 15.000 zł. This amount should be paid for two weeks after information that student has been accepted into the program.

In addition there are costs associated with an On Site Visit that will be conducted at the student's location during the second Practicum. These costs include travel and hotel room for one night for the student's Supervisor and are payable at the time of the On Site Visit. In addition there is a fee of 200 zł for the national standardized final exam.

The CREIGHTON MODEL FertilityCare™ System Practitioner Program of FertilityCare™ Centers of Poland is accredited by American Academy of FertilityCare™ Professionals and abide its Standars. Upon completion of the Program our graduates will be eligible to apply for certification through the Academy (see www.aafcp.org).

Also upon completion the student will be qualified to establish a program that can be an Affiliate of FertilityCare™ Centers of Poland www.fccp.pl

Advanced educational materials, books and study guides are sent to the student when they have been accepted into the program.

It is recomended that this process begin as soon as possible to allow the student the time needed to prepare for Education Phase I.

Creighton Model FertilityCare™ Practitioner Certificate Program

The FertilityCare™ Practitioner Program is a one- year program and prepares students to teach the CREIGHTON MODEL FertilityCare™ System to women and couples from any reproductive category. NaProTechnology®, a new reproductive science, based in the CREIGHTON MODEL FertilityCare™ System, provides new hope for couples experiencing infertility.

The Program consists of:

- Two Education Phases
- Two Supervised Practica
- On Site visit scheduled during Supervised Practicum II
- National Standardized Final Exam.

Education Phase I (EP I) is an 8 day total immersion educational experience that prepares the Intern to teach the CREIGHTON MODEL FertilityCare™ System.

Supervised Practicum I (SPI) begins with the successful completion of EP I. At this time the student is given all the teaching materials they need to teach 18 client couples. Practitioner and Instructor Interns begin establishing their centers and teaching the FertilityCare™ System as soon as they return home from EPI. During the next six months a faculty member will supervise them through an innovative system of long distance assignments, phone calls, and problem solving tools.
